Hi Guys

As mentioned at the end of last season - I was thinking of moving our Pickem from Yahoo to a custom site. This would let us come up with more variations, challenges etc.

I have **a start of an app** working. But would be nice to have a couple of folk willing to have a look and give me feedback.

<https://geeks-pickem.replit.app>

Note: the signup means you are creating a "Replit" id. If you have a problem, let me know. And send me a note if you decide to try.

My current plan is to get the same functionality as Yahoo up first. And then will start thinking of improvements.

So I would also want suggestions for mini-games and ways that those of us not named Gerald, Steve, Cindy, or Bendan can continue to enjoy the season after week 4.

So far ...

- Allow 1 on 1 challenges where the winner earns the combined points
- an automatic confidence button - by vegas odds - or random ?
- bonus weeks where you can earn 32 points on a game
- international games worth 5x
- highest game score of the week worth 3x

Well done you! I love it so far :) I signed in with my Google and if they created a Replit account in the background that is great. Just saying that for anyone else who also didn't know how to create a Replit account.

Hi Rob,

Wow - dude you amazing.

I've signed up.

I love the mini games idea. Would it be possible to almost have mini tournaments during the season and the winner of each miniT (each with a different theme or focus - picking losers, or picking the the 4 teams that score the lowest that weekend, or picking 4 teams that will have.....[RB over 100 yd, or, D with the most INT, or, etc...]) and then say there were 4 tournament weekend, then come playoff time, the 4 winners (and maybe the 4 runner ups) they go into another 8 team bracket for playoff picks? -- just throwing ideas at the wall.

You entry screen looks great - small request, can there be an indicator showing (or maybe I am missing this), for when "all picks made"?

I love it!

You rock, Rob!

Me too.

I like the auto confidence odds feature. Vegas makes sense.

Regards,
Mike

Ok, so I have played around. I don't see the autoconfidence picks. Also. I made my picks and now can't see the picks or the confidence points I put in.

Blessings,

David Horrocks

I had a little time but had my phone ... so updated the app. Added the Vegas odds feature - and marked it as done in the idea list.

Have a look
